The Annual Security Incident Report
Francis Euston R. Acero
Complaints and Investigations Division
Definitions
Get everybody on the same page
Event

An observable occurrence in an information system that actually happened at some point in time. (SANS)
Incident

An adverse event in an information system, which includes the threat of an adverse event (SANS)
Security Incident

An event or occurrence that affects or tends to affect data protection, or may compromise the availability, integrity, and confidentiality of personal data. It shall include incidents that would result to a personal data breach, if not for safeguards that have been put in place. (Sec. 3.J, NPC Circular No. 16-03)
Personal Data Breach

A breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorized disclosure of, or access to, personal data transmitted, stored, or otherwise processed. (Section 3.F, NPC Circular No. 16-03)
Nature of Personal Data Breach

1. An availability breach resulting from loss, accidental or unlawful destruction of personal data;
2. Integrity breach resulting from alteration of personal data; and/or
3. A confidentiality breach resulting from the unauthorized disclosure of or access to personal data.
The Annual Report

Contents
Documentation
Deadline for Submissions
What’s in the annual report?

• Summary of Data Breach Reports
• Aggregate Security Incidents (Not Resulting in a Breach)
  • Indicate number of incidents and breaches encountered
  • Classified according to impact on availability, integrity and confidentiality
Active Documentation

All security incidents and personal data breaches shall be documented through written reports, including those not covered by the notification requirements.

Any or all reports shall be made available when requested by the Commission.
Data Breach Report

• The facts surrounding the incident
• The effects of such incident
• The remedial action taken
Aggregated Data

- Security incidents not involving personal data
- General information that must include number of incidents and breaches encountered

Annual Security Incident Report (Data Breach Information)

Personal Data Breach No. 1
NPC Registration of Data Processing Systems
December 25, 2017

Facts
On December 25, 2017, the MIS failed to renew our SSL Certificate registration. That same day, despite the failure to renew SSL Certificate registration, data was entered into the Registration of Data Processing System database through unencrypted sessions.

That same day, the MIS informed the DPO that attackers were able to access data entered in the unencrypted sessions.

On December 26, 2017, the DPO shut down all processing related to the Registration of Data Processing Systems.

Effects/Consequences
The absence of a valid SSL Certificate led to unencrypted sessions, which the attackers got authentication cookies and altered data.

The stolen sessions and credentials affected integrity of the database of the Registration of the Data Processing System

Remedies/Action Taken
On December 26, 2017, the MIS chief, on instruction of the DPO, led the response, which was to install a valid SSL Certificate.

From December 26 to 31, 2017, the CMD, acting under instruction of the DPO, restored integrity to the Registration of the Data Processing System data process.
Submissions
Digitally signed submissions are acceptable.

Notarization not required
